

QUICKSEAL™ aseptic tube separation

Introducing...

QUICKSEAL™ aseptic tube separation system — a step forward in aseptic technique.

Using the most practical tool, on an array of tubing materials, patent-pending QUICKSEAL™ makes robust and reliable aseptic tube separation in seconds.

QUICKSEAL™ aseptic tube separation system —

You've been heard.

robust, aseptic seals in seconds

Technical Notes

Tubing Materials:

Platinum-cured silicone
C-Flex® thermoplastic elastomer

Required Accessories:

QUICKSEAL™ cutter - stainless steel

Tubing Sizes:

1/8" ID x 1/4" OD

Tubing Lengths:

12" (custom lengths available)

Sterilization:

Gamma Irradiation or Autoclave

The pre-installed QUICKSEAL™ crimp collar is affixed to the elastomeric tubing using AllPure Technologies, Inc. proprietary process.

The intuitive QUICKSEAL™ cutter takes the guesswork out of aseptic separation. A cut collar is a reliable seal.

The extensively tested QUICKSEAL™ is proven aseptic and proven to be stronger than the tubing it is a part of.
